#### 1.3 SAFETY PRECAUTIONS

#### IMPORTANT SAFETY INSTRUCTIONS—SAVE THESE INSTRUCTIONS

CAUTION: To reduce the risk of injury, read operating instructions carefully before using.

**WARNING:** Risk of injection or injury to persons – do not direct discharge stream at persons.

#### WARNING RISK OF ELECTROCUTION: 🛕

- Connect to a properly grounded outlet. Do not remove ground pin.
- Inspect cord before using do not use if cord is damaged.
- Keep all connections dry and off the ground.
- Do not touch plug with wet hands.
- This product is provided with a ground fault circuit interrupter built into the power cord. If replacement of the plug or cord is needed, use only identical replacement parts.
- Test the ground fault circuit interrupter (GFCI) before each use.
- Do not close a door on the cord or pull the cord around sharp edges or corners.
- Keep the cord away from heated surfaces.
- Do not spray liquid from the Kaivac onto electrical outlets or on any electrical devices.
- Turn off the unit before unplugging.
- ♦ Do not pull on the cord to unplug. Grasp the plug at the outlet and pull.

#### **Grounding Instructions:**

THE KAIVAC MUST BE GROUNDED. If it should malfunction or stop working, grounding provides a path of least resistance for the electrical current and reduces the risk of electrical shock. The Kaivac is equipped with a ground fault circuit interrupter (GFCI) to further reduce danger and risk of electric shock. It must be maintained and tested regularly. An equipment grounding cord and plug is included with the unit. Cutting off the ground wire or using a cord with an ungrounded plug will void the warranty on the Kaivac.

Improper connection of the equipment grounding cord can result in the risk of electrical shock. Ask a qualified electrician or service person to check the outlet grounding if you are unsure. Do not modify the plug provided with the Kaivac. If it will not fit into the outlet, have a properly grounded outlet installed by a qualified electrician.

#### MARNING: When using this product, basic precautions should always be followed, including the following:

- Read all the instructions before using the product.
- To reduce the risk of injury, close supervision is necessary when a product is used near children.

#### 3.1 **MACHINE MAINTENANCE**

▲ CAUTION Always make sure machine is unplugged before lifting electric cover assembly

## Item

## **Procedure**

Floor	Check condition of squeegee blades and wheels on the floor tool.
Squeegee	Rough floor surfaces will cause the blades and wheels to wear out more quickly. Replace as necessary
Spray Gun	<ul> <li>Check spray pattern. If spray pattern will not pinpoint, clean orifice by removing it with an Allen wrench and flushing. Replace if needed.</li> <li>If nozzle becomes difficult to move from high to low pressure lubricate nozzle with lithium grease.</li> </ul>
Pressure	Wipe clean after each use.
Hose	Check for cuts or frays in the hose jacket, particularly at the end of the fit- tings. Replace hose if cuts are found
Water	Check condition of filter in water tank. Clean as needed.
Tank	Empty the water tank to prevent mildew and bacteria growth. Empty tank by dipping the vacuum hose into the water tank and transferring the water to the vacuum tank.
Vacuum Tank	Empty and flush vacuum tank.
	Clean and disinfect.
	Check the float shutoff screen to be sure it is not plugged up. A plugged filter screen restricts airflow and results in reduced suction.
Leaks	Be alert for leaks around hoses, fittings, spray wand, tanks or elsewhere.
	Discontinue use until leaks are repaired
Electrical System	The ground fault circuit interrupter (GFCI) must be tested before each use.
	Electric cord must be inspected for tears or cuts in the insulation.
Vacuum Wand	Use a wire brush or coarse brush with acid cleaner or other to remove residue from threads on the coupling and coupling nut. Apply grease when done.
HEPA Filter	Replace every 3-6 months depending on use

## 3.2 BLACK BOX REMOVAL INSTRUCTIONS

Remove all hoses, cords, and tools prior to black box removal.

Laying the machine on its back remove the four yellow wingbolts as shown above

Placing your foot on one of the two handles, tilt the yellow tanks upward until standing upright

Locate and disconnect the water line and return line behind the black box on the machine
