I.- FINAL TEST FOR PRODUCT SAFETY

At the completion of any repairs the product should be electrically tested for operating and electric strength as follows.

1.- ELECTRIC TEST

- 1).- Set hi-pot test meter at 1500 volts.
- 2).- Product handles tube to "ON" position.
- 3).- Touch one probe of tester to one blade of power cord plug and touch other probe to handle tube, there should be no breakdown.

2.- OPERATING TEST

Run the machine with the height adjustment knob on high and check:

- 1).- There should be no abnormal noise or vibration.
- 2).- The carbon brushes spark should be small and uniform.
- 3).- The current should not exceed 9.0 Amps. and 7.0 Amps

Note: The letters with the item number, references, identify item number on internal (1) or external (E) illustration.

II.- REPLACEMENT PROCEDURES

1.- TO REMOVE BAG (33), FIG. 1

- 1.1.- Release spring (38-E) from handle, turn knob on bag coupling (27-E), slide coupling off unit

2.- TO REMOVE HAN OLE TUBE (7 , 10), FIG. 1,2

- 2.1.- Disengage line cord from line cord retainer (3) pulling cord outward from retainer bottom
- 2.2.- Remove bolt and nut (8 and 9) on handle socket (24) and pull tube out.

3.- TO REPLACE BELT (31)

- 3.1.- Place upright on hood so wheels face upward Make sure to place on protected surface not to damage hood.
- 3.2.- Remove retaining bar (46) by pressing down on right side (Longest), remove brush rolls cover (45) and fan cover (30).
- 3.3.- Stretch and twist belt over motor pulley (15-M) to pull it out. (if not broken)
- 3.4.- Remove complete brush roll (43) with bearing supports (44) pulling it out near the bearings.
- 3.5.- Place new belt on roll, replace roll on chassis making sure the mark "top" on bearings support faces towards the brush roll cover and reassemble.

4.- TO REPLACE BRUSH ROLL (43) OR BEARING SUPPORTS (44)

- 4.1.- Follow steps indicated on point 3.1 to 3.4.
- 4.2.- Remove bearing support (44) pulling them away from brush roller (old or new)
- 4.3.- Place bearing supports on new brush roll, place belt over roll and replace to on chassis following steps 3.5.

5.- TO REPLACE REAR WHEELS (14)

- 5.1.- Remove hood as in step 7
- 5.2.- Pull out retainer pin (15) from axle (8) and take out axle assembly.
- 5.3.- Replace then new wheel and axle, and insert two washer (55) and clip ring (15).
- 5.4.- Replace hood

6.- TO REPLACE FRONT WHEELS (34), FIG. 3, 4

- 6.1.- Remove hood as in step 7
- 6.2.- Remove screws (4-1) from axle supports (36) and take out axle assembly.
- 6.3.- Remove axle with wheels
- 6.4.- Replace the new front wheel.
- 6.5.- Replace axle assembly on chassis making sure springs (38 and 42) is in place.
- 6.6.- Replace hood

7.- TO REMOVE THE HOOD (17), FIG. 1,2

- 7.1.- Remove bag
- 7.2.- Depress handle release pedal (25) and put handle tube to horizontal position.
- 7.3.- Remove screw from height adjustment knob (11) and pull out knob (12).FIG. 1
- 7.4.- Place upright on hood so wheels face upward, make sure to place on protected surface not to damage hood.
- 7.5.- Remove springs (18) from "v" tabs chassis, turn upright holding hood and separate hood from chassis, removes nut (30).FIG 2

8.- TO REPLACE MOTOR (3), FIG. 2

- 8.1.- Remove belts as in steps 3.1 to 3.3.
- 8.2.- Remove hood as in step 7
- 8.3.- Release air ducts (2 and 13) applying pressure on both sides and slide out.
- 8.4.- Remove the four motor base screws (4l) disconnect switch leads and pull out motor.

9.- TO REPLACE HEIGHT ADJUSTMENT CAM (12), FIG.2

- 9.1.- Remove hood as in step 7
- 9.2.- Slide cam assembly out
- 9.3.- Replace new cam and reassemble.

10.- TO REPLACE HANDLE RELEASE PEDAL (25), FIG. 3, 4

- 10.1.- Remove hood as in step 7
- 10.2.- Remove spring (26) from chassis
- 10.3.- Pull pedal towards spring side and remove

11.- TO REPLACE HANDLE SOCKET (19), FIG. 2

- 11.1.- Remove hood as in step 7
- 11.2.- Remove handle release pedal as in step 10
- 11.3.- Remove "C" washers (15) from socket bolt (16) pull out bolt and remove socket.

12.- TO REPLACE HANDLE POSITION CAM (21), FIG. 2

- 12.1.- Remove handle socket as in step 11
- 12.2.- Pull out "C" washer (24) and bolt (23) remove cam spring (22).
- 12.3.- When reassembling is sure spring (22) is located as before.

13.- TO REPLACE THE CORD ASS "3" (2A), FIG. 1, 2

- 13.1.- Disconnect the cord assembly 3" from the cord extension.
- 13.2.- Remove hood as in step 7
- 13.3.- Remove the nut (49), washer (50) and the ground lead.
- 13.4.- Disconnect the line cord.
- 13.5.- Remove Heyco strain relief (17) from chassis with Heyco
- 13.6.- Slide strain relief and hook and the new cord assembly 3", and reassemble with the Heyco pliers making sure to locate the strain relieve as it was before.

14.- TO REPLACE THE LIGHT BULB (6)

- 14.1.- Remove the hood as in step 7.
- 14.2.- Pull the light bulb out with a gentle side-to-side rocking and replace with a new one.

15.- TO REPLACE THE ON - OFF SWITCH (12-M)

- 15.1.- Remove hood as in step 7
- 15.2.- Disconnect the electrical terminal from switch.
- 15.3.- Press the side tabs on the switch and pull it out.
- 15.4.- Press the new switch on the opening until the tabs snap, and reconnect the terminal.

16.- TO REPLACE THE SWITCH ACTUATOR (31-1)

- 16.1.- Remove hood as in step 7
- 16.2.- Remove "e" washer (36-1) from bolt (31 B-I) and slide out the actuator assembly.
- 16.3.- Replace the new actuator and assembly.

17.- TO REPLACE THE FAN (14-M)

- 17.1.- Remove the belt as in point 3.1, 2 and 3.
- 17.2.- Hold the fan (14-M) while turning loose the nut (15-M).
- 17.3.- Remove nut and fan
- 17.4.- Replace the new fan and reassemble.

NOTE: Two washer and spacer for fan of plastic

18.- MOTOR SERVICING, FIG. 5

The only possible motor repairs are: Replace carbon brushes. Replace armature. Replace field. Never try to repair the field or armature, it detective replace with a new one.

19.- TO REPLACE THE DUST CUP (ONLY DC SERIES), FIG. 6

- 19.1.- Place handle in upright position and unhook spring (1), shake bag (3) to release dirt accumulated in bag.
- 19.2.- Release the two latches by pulling them outward.
- 19.3.- Remove cup and replace it.

TO DISASSEMBLE THE MOTOR

- 1.- Remove motor as in point 8
- 2.- Hold the fan (14-m) while turning loose nut (15-m) and remove nut and fan.
- 3.- Remove the electrical connection to carbon brushes pulling them out of the terminals.
- 4.- Remove the brush holders support screws (5-m) and take out the brush holder assembly (3-m), if the carbon brush is worn out replace the complete assembly (3-m)
- 5.- Remove the four motor covers screws (2-m) and lift the motor cover (1-m).
- 6.- Remove field and armature and replace as required.
- 7.- Reassemble in reverse order making sure the field spring (10-m), the ground washer (16-m) and ground lead are in correct position.

III.- TROUBLE SHOOTING CHART

PROBLEM	POSSIBLE CAUSE	SOLUTION
A) Motor does not run	1.- Not firmly plugged in.	1.- Check attachment plug.
	2.- Bad ON-OFF switch.	2.- Replace switch.
	3.- Line cord open	3.- Replace cord.
	4.- Motor open	4.- Check motor and wiring.
	5.- Fan blockage by material	5.- Remove obstruction
B) Motor runs but cleaner does not run pick-up	1.- Belt broken.	1.- Replace belt.
	2.- Blockage air system.	2.- Replace obstruction.
	3.- Fan broken.	3.- Replace fan.
	4.- Worn brush roll.	4.- Replace brush roll.
	5.- Motor slow.	5.- Check carbon brushes.
	6.- Bag full.	6.- Empty bag (or change paper bag).
C) Motor runs erratically	1.- Worn carbon brushes.	1.- Replace brushes.
	2.- Detective armature.	2.- Check spark, replace
	3.- Bad electrical connection.	3.- Check wiring.
	4.- Detective On-Off switch.	4.- Replace switch.
D) Brush roll vibrates	1.- Ball bearing worn out.	1.- Replace brush roll.
	2.- Ball bearing holder damaged.	2.- Replace ball bearing holder.
E) Head light does not run on	1.- Bad connections.	1.- Check wiring.
	2.- Light bulb burned out.	2.- Replace bulb.

WHEN ORDERING ,DO NOT FORGET TO SPECIFY :

- ✓ PART NUMBER
- ✓ DESCRIPTION
- ✓ MODEL NUMBER

NOTE: Drawing numbers are for identification purposes only.

This exploded view diagram illustrates the assembly of a vacuum cleaner. The components are numbered as follows:

- 1:** Motor housing
- 2:** Motor
- 3:** Motor bracket
- 4:** Motor mounting bracket
- 5:** Motor mounting screw
- 6:** Motor mounting plate
- 7:** Motor mounting bracket
- 8:** Motor mounting bracket
- 9:** Motor mounting bracket
- 10:** Motor mounting bracket
- 11:** Motor mounting bracket
- 12:** Motor mounting bracket
- 13:** Motor mounting bracket
- 14:** Motor mounting bracket
- 15:** Motor mounting bracket
- 16:** Motor mounting bracket
- 17:** Motor mounting bracket
- 18:** Motor mounting bracket
- 19:** Motor mounting bracket
- 20:** Motor mounting bracket
- 21:** Motor mounting bracket
- 22:** Motor mounting bracket
- 23:** Motor mounting bracket
- 24:** Motor mounting bracket
- 25:** Motor mounting bracket
- 26:** Motor mounting bracket
- 27:** Motor mounting bracket
- 28:** Motor mounting bracket
- 29:** Motor mounting bracket
- 30:** Motor mounting bracket
- 31:** Motor mounting bracket
- 32:** Motor mounting bracket
- 32A:** Motor mounting bracket
- 32B:** Motor mounting bracket
- 33:** Motor mounting bracket
- 33A:** Motor mounting bracket
- 33B:** Motor mounting bracket
- 33C:** Motor mounting bracket
- 33D:** Motor mounting bracket
- 34:** Motor mounting bracket
- 34A:** Motor mounting bracket
- 34B:** Motor mounting bracket
- 35:** Motor mounting bracket
- 36:** Motor mounting bracket
- 37:** Motor mounting bracket
- 38:** Motor mounting bracket
