INTRODUCTION

OPERATING & MAINTENANCE INSTRUCTIONS

READ THIS BOOK

This operator's book has important information for the use and safe operation of this machine. Read this book carefully before starting the machine. Keep this book and tell all operators to read the book. If you do not follow the instructions, you can cause an injury or damage equipment, furniture or buildings.

For new books write to:

Pacific Steamex, Inc. 2259 S. Sheridan Muskegon, MI 49442-6252

Carefully inspect all components to ensure that there is no concealed freight damage. If such damage is discovered, file a "CONCEALED DAMAGE REPORT" immediately with the delivering carrier.

The contents of this manual are based on the latest product information available at the time of publication. Pacific Steamex reserves the right to make changes or improvements to its machines without notice.

FOR YOUR CONVENIENCE, RECORD THE MACHINE MODEL AND SERIAL NUMBER:

MODEL	 		
SERIAL NUMBER_			

VACUUM INLET FILTER

This machine has a vacuum inlet filter that will require periodic cleaning or replacement. The filter is located within the vacuum housing just above the vacuum motor.

To clean: Simply snap the filter retainer out of the housing, remove the filter and shake or vacuum it. If the filter is worn or uncleanable, replace.

HEPA FILTER (OPTIONAL)

Hepa Models include a hepa filter (Item 38) that will also require periodic cleaning or replacement.

To clean: Remove the cover (Item 41) to access the hepa filter, remove the filter and shake or vacuum it. If the filter is worn or uncleanable, replace.

BRUSH STRIP REPLACEMENT

This machine has a removable brush strip. Replace it if it becomes worn to the point where it no longer contacts the carpet. To replace: First remove the three (3) phillips screws that hold the access plate on the bottom of the brush housing. Once the brush roller is exposed, remove the R.H. Support. The brush strip can now slide off - remove and replace with a new one. Be sure the strip is pushed all the way in. Reassemble.

VACUUM MOTOR MAINTENANCE

Have the vacuum motor inspected annually by a Factory Authorized Service Technician. If the carbon brushes are worn, they should be replaced. This service will prolong the life of the vacuum motor.

The replacement of belts and other repairs to the machine should be performed by a Factory Authorized Service Technician.
