

AERO 8/15

 **Five-star air quality for all**
Better air quality as standard.

TASKI AERO 8/15 Plus brings you:

- HEPA H13 Filter supplied as standard for extra value on all Plus and Power models
- Upgraded components & accessories for even greater durability
- Advanced features in a unique combination
- Sustainable high-efficiency concept with Eco-function
- Ultra-silent TASKI whisper technology

HEPA H13 Filter and upgraded floor tool as standard on AERO Plus and Power models

HEPA filters deliver higher levels of filtration for cleaner air. Cleaner air means superior air quality that we all breathe. Both AERO 15 Power and AERO Plus models are upgraded and supplied as standard with HEPA H13 Filters. Read our whitepaper to find out more about Indoor Air Quality (IAQ). To find out more go to <https://taski.com/intelligent-solution/hepa/>

Upgraded components and accessories for even greater durability

The series 2 upgrade delivers an upgrade to all AERO 8/15 models. Starting with new wheel, hood cover, molding joints, cables and extra protective packaging. New accessories include stronger & tougher telescopic tube, metal elbow and hose connector.

Sustainable high-efficiency concept with Eco function

The new TASKI AERO tub vacuum cleaners are highly efficient and use a 585W state-of-the-art vacuum motor, which delivers the same cleaning performance as vacuums with 900W or more. In addition, the TASKI AERO Plus has an eco button which reduces energy consumption to 295W. As a result, the vacuum cleaner saves significant amounts of energy and reduces CO2 emissions without compromising on cleaning results at all.
